Metos LUX 60EL Dishwasher

Metos Master Lux 60EL is an electronic machine for undercounter operation. The machine has a standard diagnose function that supports self-monitoring and ensures a sufficiently high temperature in the final rinse with every wash cycle. The fully insulated unit keeps the noise level and the surface temperatures low. The digital control panel shows what is going on in the unit and when the machine is ready to receive dishes for washing. The machine has four wash programmes: 1/2/3/5 minutes.

The stainless steel structure and rounded seamless details (tank, basket guides and door) make the unit easy to keep clean. The easily removable washing arms are easy to clean when needed. The tank volume is 17 litres. In cases where the unit cannot be connected to a floor drain, models are fitted with a drain pump (PS marking in the table) so that the wash water can be discharged into the washing counter sink.

Standard delivery:

- rinse aid dispenser
- liquid detergent dispenser
- baskets for plates and cups and cutlery cylinder
- marine feet

Optional equipment comprises a stand, additional baskets, pre-wash showers, pressure boosting pump and steel reinforced hose.
